Existing Site

You can help save the lives of sudden cardiac arrest victims.

The Minnesota Resuscitation Consortium, a member of the HeartRescue Project, along with partners throughout Minnesota working to improve outcomes from Sudden Cardiac Arrest are providing a free online Automated External Defibrillator (AED) Registry to support AED owners to properly maintain their AEDs. This Minnesota AED Registry will notify AED owners with management and maintenance reminders for their registered AEDs.

AED acquisitions for workplaces, schools, pieces of worship, and public facilities are a wise investment. Many national and local groups, as well as AED manufacturers stress the importance of not only placing the devices in public access settings, but ensuring their readiness and location awareness in an emergency situation.

Join the Minnesota AED Registry Today

Register Now!

Joining is free, and organizations registering AEDs in the Minnesota AED Registry receive the following free benefits:

- AED inspection email reminders
- AED battery date expiration email reminders
- AED electrode date expiration email reminders

Get Started

Your AED registration will help you be a part of BRINGING BACK THE BEAT!

Login to the Minnesota AED Registry

Login email address: 
Password: 

forgot your password?

While the Minnesota Good Samaritan Law (604A.01) provides immunity for Good Samaritans using an AED, this immunity can be jeopardized by not properly maintaining the device. Proper maintenance includes changing electrode pads and batteries prior to their expiration dates.

The Minnesota AED Registry is a source for regular email reminders to periodically check the device to ensure it is in working order. You will also be reminded to replace soon-to-expire electrode pads and batteries.

Is this AED registered with the Minnesota AED Registry?

The National AED Registry is a free tool that helps AED owners maintain the AED by sending email reminders when pads or batteries are due to expire, manufacturers notices and inspection checks. Registering AEDs can also assist in locating devices for responders and 911 dispatch for cardiac emergencies.

Registering your AED is easy!

When seconds count - make sure your AED is ready!

Register AEDs at
minnesota.nationalaedregistry.com

Welcome to the Maryland AED Registry

The Maryland Public Access Automated External Defibrillator Program permits a business, organization, association, etc., which meets certain requirements, to make automated external defibrillators (AEDs) available for individuals suffering sudden cardiac arrest on the premises prior to the arrival of emergency medical services personnel.

Maintenance Emails
Receive friendly monthly reminders for you and your inspectors, to help you ensure your AEDs are up to date

Expiration Alerts
Timely alerts to let you know when your AEDs battery or electrode is about to expire and needs to be replaced

Recall Alerts
We'll notify you when a recall alert is issued by the manufacturer, affecting the model of the AED you registered

AED Link Participation
When you register your AED you have the option to make its location publicly available to emergency dispatchers

National AED Registry

Instructions for Site Managers
If you are a site manager in charge of your organization’s AED program, this attached PDF below will help you understand our system, the role of the inspectors and responders, and how to best take advantage of the benefits offered by our system.
Instructions for using the National AED Registry.pdf

Instructions for Inspectors
If you are an individual within your organization who will receive National AED Registry maintenance messages, and you check the status of your company’s AED’s, batteries and electrodes, the attached PDF is a quick tutorial to help you become familiar with this process.
Instructions for inspectors in the National AED Registry.pdf

Availability
- By making your AED "public", you will be enhancing your community's ability to respond to a victim of Sudden Cardiac Arrest. Time is the most critical variable in cardiac arrest survival. You, or your company, have recognized that by purchasing the AED, if your community subscribes to the AED Link™ system and a cardiac arrest occurs within 1,200 feet of your location, the 9-1-1 operator will be able to identify your location and direct someone to ask you, or a designee, to bring the AED to help save a life.
- If your community subscribes to the AED Link™ system and you designate your AED "private", your AED will not be summoned by 9-1-1 in the event there is a cardiac arrest anywhere but at your location.
- This AED is:
  - Public: Available to be used both at this site and at nearby offsite locations
  - Private: Available to be used at this site only
